Work. Life. Balanced.

Senior Mobile App Developer

Description

ShiftX mission is to make scheduling simple and create an outstanding employee experience. We are taking a radical approach to workforce management. With unprecedented products and tools, we're not just revolutionizing the way our clients manage scheduling, we're transforming the way their employees experience scheduling. Whether our clients are looking to increase employee satisfaction, reduce operating costs, or revamp their employee management systems, ShiftX provides the platform to change the way they manage their workforce.

Are you interested in SHIFTing the conventional thinking in scheduling to create a disruptive platform that combines artificial intelligence capabilities with an innovative, user centric design?

- We are looking for a product-focused engineer who cares about excellence in what they deliver.
- We are a company where autonomy, creativity, thoughtfulness, and trust are valued, and opportunities to grow are limited only by your imagination.
- This role is not for the unseasoned. We need a coder and a leader, who has an appreciation for good design and usability.

The technical problems we solve aren't simple, but this means you'll be able to do work that matters and help a ton of people in a way you've never imagined.
