Senior Mobile App Developer

Employment Type

Full time

Job Location

Chandler, AZ

Date posted

June 7, 2019

Description

ShiftX mission is to make scheduling simple and create an outstanding employee experience. We are taking a radical approach to workforce management. With unprecedented products and tools, we're not just revolutionizing the way our clients manage scheduling, we're transforming the way their employees experience scheduling. Whether our clients are looking to increase employee satisfaction, reduce operating costs, or revamp their employee management systems, ShiftX provides the platform to change the way they manage their workforce.

Are you interested in SHIFTing the conventional thinking in scheduling to create a disruptive platform that combines artificial intelligence capabilities with an innovative, user-centric design?

- We are looking for a product-focused engineer who cares about excellence in what they deliver
- We are a company where autonomy, creativity, thoughtfulness, and trust are valued, and opportunities to grow are limited only by your imagination
- This role is not for the unseasoned. We need a coder and a leader, who has an appreciation for good design and usability.

The technical problems we solve aren't simple, but this means you'll be able to do work that matters, and help a ton of people in a way you've never imagined

Responsibilities

Developing stellar mobile apps for ShiftX product suite.

Qualifications

Knowledge and Abilities:

- 3+ years of experience working with native iOS or Android development
- Experience with React Native
- Extensive knowledge of Git
- A strong portfolio of prior mobile development work

Requirements (Android)

- Experience with Java and the Android SDK
- Experience working with remote data via REST and JSON
- Experience with third-party libraries and APIs
- Solid understanding of the full mobile development life cycle
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Proficient understanding of versioning tools, such as Git and GitHub

Requirements (iOS)

- Objective-C

- Swift
